A. PROFESSIONAL SUMMARY

LLB graduate, legal consultant, web developer, and digital strategist with experience in legal advisory services, website development, mobile app management, AI-assisted productivity systems, and digital operations. Experienced in legal research, legal drafting, CCMA preparation, business administration, and full-stack digital project execution.

Founder and long-standing volunteer at the South African Learner Support Organisation NPC, where I have contributed since inception across legal advisory, website development, mobile application development support, digital operations, social media management, proposal drafting, financial administration, photography, videography, and organisational branding.

Strong practical experience using modern AI systems including ChatGPT, Google Gemini, Claude AI, and DeepSeek to accelerate productivity, automate workflows, generate advanced prompts, develop AI-assisted systems, and support frontend/backend development processes. Able to adapt quickly, work independently, and deliver high-quality work under pressure.
